

Wireless Policy

Haddonfield Public Library provides free wireless access to those visiting the library who wish to use their own devices (e.g. laptops, tablets, smartphones) to access the Internet and online applications. Wireless users must agree to abide by the Library's **Code of Conduct**. For use of public computers and Internet on library owned equipment, see the **Public Computers and Internet Use Policy**. By choosing to use this free wireless network service you agree that:

- The wireless access we offer is unfiltered and access is not restricted
- Users will not access content in a way that is inappropriate for an open public area shared by people of all ages and backgrounds or that disturbs or interferes with customers, employees or operations of the library.
- The library accepts no responsibility for any software downloaded and/or installed, email opened, or sites accessed while customers are on the wireless internet connection. Any damage done to the patron equipment or self from viruses, identity theft, spyware, plug-ins, or other internet-borne programs is the sole responsibility of the customer; and the customer holds harmless the Library from any such damage.
- The library makes no guarantees about, and is not responsible for, the security of information transmitted and received during the customer's wireless internet session.
- Parents are encouraged to take an active role in their children's use of the Internet and discuss their expectations for their children's use of this information tool. Parents - and only parents - have the right and the responsibility to restrict the access of their children - and only their children - to library resources.
- While affirming the customer's rights to confidentiality and privacy, persons are advised that because security is technically difficult to achieve, electronic communications and files could become public.
- Library staff cannot provide in-depth training or troubleshooting concerning the internet, wireless access, or the customer's equipment.
